

IRTEC P IVT

8-14 μm documenting portable
infrared thermometer with camera
imaging

IRtec P IVT is a portable infrared thermometer with an embedded camcorder that is able to display both the visible area and the measured temperature into a single easy-to-use solution, over a large temperature range from -50°C to 1000°C and with a short response time of 150 ms.

Compact, light and easy-to-use, it is the perfect tool for documenting measurements with photo, video or data acquisition.

Description

IRtec P IVT is a portable infrared thermometer with an embedded camcorder that is able to display both the visible area and the measured temperature into a single easy-to-use solution, over a large temperature range from -50°C to 1000°C and with a short response time of 150 ms. Compact, light and easy-to-use, it is the perfect tool for documenting measurements with photo, video or data acquisition. A MicroSD card can be added in option to increase the memory storage capacity.

Equipped with an input for thermocouple type K, a humidity sensor and a dual laser pointing system, IRtec P IVT also benefit from a large LCD display allowing temperature and humidity measurements to be displayed together with MIN and MAX values.

- Adjustable emissivity from 0.1 to 1.00 (Preset at 0.95)
- Short response time (150 ms)
- Dual ultra-bright laser pointer
- Recording of images (JPEG), videos (AVI) and text (TXT)
- Measurement of relative humidity, temperature and dewpoint
- Input for thermocouple type K with universal MiniDin connector
- Large LCD display area for measurements and MIN / MAX values
- MicroSD card slot
- Easy handling with pistol grip
- Compact and light

IRtec P IVT is more particularly adapted to temperature measurements of the following objects:

- Moving parts (running paper rolls...)
- Gears and motors
- Live parts (electrical components, transformers...)
- Non-touchable parts (freshly painted parts)
- Food
- Corrosive substances
